What is NotebookLM Plus?

An enhanced personal AI research assistant with increased limits for audio overviews, notebooks, and sources per notebook.

What does NotebookLM Plus do?

Summarizes single or multiple documents

Answers questions about uploaded content

Generates outlines, study guides, or brainstorm ideas

Cites answers directly from your files

Explains complicated topics in simpler terms

Values privacy and does not use personal data to train its model

Incorporating NotebookLM Plus into your daily life

Saving Time

Drastically reduce time spent reading, searching, and manually synthesizing information.

Enhanced Understanding

Gain deeper insights and connections within complex materials.

Improved Productivity

Streamline workflows for research, writing, and learning.

Accessibility

Audio overviews cater to different learning styles and on-the-go consumption.

Realistic Examples or Use Cases

Summarizing Lecture Notes

Use Case: A student uploads lecture slides or a Google Doc of class notes.

Ask: “Summarize the key concepts from my CS 101 notes.”

Benefit: Saves time reviewing and builds quick-study summaries.

Understanding Difficult Concepts

Use Case: A student uploads course material from DSA that’s hard to grasp

Ask: “Explain this reading in simpler terms.”
“Break this concept down for a beginner

Benefit: Makes complex content easier to understand.

Support for Group Projects

Use Case: A group uploads their brainstorming doc, rubric, and notes.

Ask: Create a presentation outline from this document."
“What’s missing from our project based on the rubric?"
Benefit: Keeps group work on track and aligned with the assignment.

Keeping Up With Class If You Miss a Day

Use Case: A friend shares class notes and readings you missed.

Ask: "Summarize what was covered this week."
"What are the most important takeaways from these notes?"

Benefit: No more falling behind in class or begging for help in group chats.

Key learnings and takeaways

Summarizes multiple documents
Generates outlines
Brainstorms ideas
Assists with note-taking and creating study guides
Shows citations for its work from sources
Explains complex topics into simpler terms
Doesn’t use personal data to train its model
